Double Capacity, Modular Construction

The Ultra Space Saver provides easy and ample space for u-lock security on nearly any bike, including bikes with fenders. Thanks to design enhancements, the double-sided Ultra Space Saver park more than double the capacity of a standard bike rack. The Ultra Space Saver is an easy to install, modular system. It can be made to fit in nearly any space. Options include: wall-mount, floor-mount, and double-sided.
ULTRA SPACE SAVER

- Modular design fits nearly any space
- U-lock compatible
- Easy assembly
- Double your capacity

CAPACITY

Modular construction
1 Bike per arm

MATERIALS

Hanger is 1" diameter tube with 1/2" steel rod and retaining disk at each end.
Upright is 2" square tube.
Feet are AISI C3 x 4 galvanized steel channel.
Crossbeams are 1.25" sched. 40 galvanized pipe (1.660" OD)
Spacers are 2.375" OD plastic tubes with .218" wall thickness.

FINISHES

Black powder coat
Cross bars: hot dipped galvanized
Hanger rods: rubber coated
Spacers: plastic

☐ Powder Coat (Interior Use)
Our interior powder coat finish assures a high level of adhesion and durability for indoor use by following these steps:
1. Sandblast
2. Final thick TGIC polyester powder coat

☐ Powder Coat (Exterior Use) Additional Cost
Our exterior powder coat finish assures a high level of adhesion and durability for outdoor or exposed air use by following these steps:
1. Sandblast
2. Epoxy primer electrostatically applied
3. Final thick TGIC polyester powder coat

MOUNT OPTIONS

☐ Floor Mount
Ultra Space Savers have steel channel feet (30" for single sided and 56" for double sided units) which must be anchored to the floor.

☐ Wall Mount
A wall mounted unit which contains special brackets is also available.

WHEEL STOPS

☐ Include optional wheel stops

As a general guideline, this space can fit approximately 60 bicycles.

The Ultra Space Saver Squared parks one bike every 16" with a typical bike extending out 40" from the wall.
ULTRA SPACE SAVER
Installation Instructions

The Ultra Space Saver has several steps for installation. Note that the single and double sided setups and parts are different. Make sure you follow the instructions according to the model you ordered.

Recommended Base Materials:
Solid concrete is the best base material for installation. Make sure nothing is underneath the base material that could be damaged by drilling (i.e. post-tension cable). Use the 3.75" wedge anchors that are included to install the rack into the concrete (wall anchors are 3").

Installation:
Sort out the parts to the rack and identify each of them accordingly. The 1" carriage bolts are for assembly of the rack and the 3.75" wedge anchors are for mounting the rack to the floor.

Reading your Dero designed layout
Ultra Space Savers come in varying configurations, making it very important that you carefully follow the layout provided by Dero when installing the racks. If you do not follow the diagram, you may well end up short of parts. The length of each Ultra Space Saver unit is indicated by a number ranging from B2-B7 in the layout. This number corresponds to the length of crossbeams to be installed. In the example provided below the Ultra Space Saver is to be installed starting with two B4 units, which have 44" crossbeams, followed by a B5, which has 76" crossbeams.

ULTRA SPACE SAVER
Installation Instructions – Wall Mount

TOOLS NEEDED

9/16” Wrench/Socket
3/8” or 1/2” Masonry Drill Bit
(Depending on anchor type)
Tape Measure
Drill (Hammer drill recommended)
Hammer
Level
Marker or pencil

NOTE

Before installing make sure the wall is strong enough to accommodate the rack fully loaded with bikes. Steel stud walls are not suitable for installation.

1

Lay out parts on the floor where unit is to be installed and be sure you have all necessary parts.

2

Drill Holes into wall, put the wall bracket back up and insert wall anchors through holes in bracket and set the anchors. For setting the anchors and diameter and depth of holes, follow instructions sent with the anchors. Make sure bracket is level.

3

Place first wall bracket on wall where you want to install the bike rack. The lowest hole of bracket should be 50” from the ground. Mark holes for drilling.

4

On galvanized cross beams, Place a mark three inches from each end. This mark will show you how far to slide the cross beam into the wall bracket.

Drill Holes into wall, put the wall bracket back up and insert wall anchors through holes in bracket and set the anchors. For setting the anchors and diameter and depth of holes, follow instructions sent with the anchors. Make sure bracket is level.
Thread 3/8” by 3/4” tightening bolts into holes in bracket. Insert crossbeams into bracket. Slide on arms and spacers, make sure arms are staggered. At end of last arm place 3” spacers and install end bracket, making sure cross beams are level.

If installing more than one set of Ultra Space Saver arms, continue from last installed wall bracket and repeat steps 3-5 above.

Measure out space. Attach feet to uprights with carriage bolts provided.
ULTRA SPACE SAVER
Installation Instructions – Floor Mount

2

Lay assembled uprights with crossbeams attached on their side so crossbeams are facing up. Slide first hanger arm on. Then slide the plastic spacers on.

3

Slide next arm on but make sure to stagger height of each arm so that the hanger rod is at a different level from its neighboring arms. For double sided model slide arms on opposite each other. Repeat until the crossbeams are full. For single-sided installs place 3” spacer at end (part # SS-Spacer-3”)

Tip rack up and attach the second upright. Tighten bolts. Slide assembled rack into final location. For add-on units repeat steps.

Anchor rack to floor with 3.75” wedge anchors.
ULTRA SPACE SAVER
Installation Instructions – Tire Stop (optional)

1. Attach tire stop to uprights with supplied hardware

2. Continue attaching tire stops if using a modular system
