

Note: Each Bikekeep station requires an SLA to be renewed annually.

- CAPACITY**
- 5 Bikes
 - 10 Bikes

FINISHES **Powder Coat Only**
A TGIC powdercoat finish is standard. Body of rack is dark gray (RAL 5008) with light green (RAL 6018) arm.

MOUNT OPTIONS

- Surface Mount**
Each dock is mounted directly to concrete surface with steel channel running between stations to cover wiring.

- Ground Plate**
Each dock is mounted to a segment of steel plate.

All installations must be hardwired.

E-BIKE CHARGING

- Non-Charging (No Outlets)**
Requires electrical hookup to a dock at either end of the station.

- Add Outlets for E-Bikes**
Stations for e-bike charging will include an electrical cabinet at one end of each row of docks.

Both charging and non-charging installations require 110v power.

CAMERA

- Optional Security Camera**
Motion-captured security images accessible remotely. Captured video available upon request or by accessing the SD card.
(1 camera per set of docks).
